

Parking

Cleveland State University

Euclid Avenue Student Parking

Cleveland, OH | 66,861 SF | 228 car

The 2½-story, 66,861 SF, 228-car parking structure is associated with a new 600-bed student housing complex. The parking structure was constructed in Phase 1 of the two-phased project and achieved LEED Silver certification.

The garage utilized a cast-in-place post-tensioned structural system. Given the structure's integration with the student housing complex, the garage was architecturally clad incorporating a variety of finishes as well as a green wall to soften the urban setting.

This project achieved LEED BD+C: NC - LEED Silver in 2012
